PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in Cybersecurity, Software Development, and AI-powered applications. Experienced in threat monitoring, vulnerability assessment, network security, and secure application development through industry internship exposure and practical projects. Built an AI-Powered Security Operations Center (SOC) integrating SIEM, IDS, machine learning, and LLM-based threat analysis, alongside deploying full-stack and AI-driven applications using Python, Java, SQL, LangChain, Streamlit, and PostgreSQL. Passionate about cybersecurity operations, threat detection, and developing scalable technology solutions.

TECHNICAL SKILLS

Languages: Python, Java, SQL
Web & Frameworks: HTML5, CSS3, Streamlit, REST APIs
Databases: PostgreSQL, MS SQL
Cybersecurity: Wireshark, Nmap, Kali Linux, Cryptography, Network Security, John the Ripper
Tools: Git, GitHub, Linux, Hugging Face Spaces, Deployment
Core CS: Data Structure and Algorithms, Database Management System, Operating Systems, Object-oriented Programming, Software Engineering

EXPERIENCE

Xorvo Technologies Pvt. Ltd. Cybersecurity Intern	Remote Feb 2026 – Aug 2026
- Assisted in monitoring and analyzing security systems to identify vulnerabilities, threats, and potential risks across networks and applications. - Collaborated with cybersecurity professionals to implement security controls and support incident response activities. - Worked with cybersecurity tools, frameworks, and industry best practices to strengthen threat detection, risk management, and compliance processes. - Gained hands-on exposure to network security, vulnerability assessment, threat monitoring, and cybersecurity operations in a real-world environment.	

PROJECTS

AI-Powered SOC (Security Operations Center) <i>Python, Flask, Scikit-learn, OpenSearch, Wazuh, Suricata, REST APIs</i> - Built a full-stack cybersecurity monitoring platform using Python, Flask, Scikit-learn, OpenSearch, and REST APIs. - Engineered an ML pipeline with RandomForest classifier and Isolation Forest anomaly detector to categorize alerts into Critical, High, Medium, and Low severity levels. - Integrated Wazuh SIEM, Suricata IDS, and the MITRE ATT&CK framework for real-time log collection, threat detection, and alert enrichment. - Developed an LLM-powered AI Security Chatbot and Incident Report Generator using Anthropic API with multi-turn session memory. - Designed a live SOC dashboard with real-time alert tables, severity charts, and multi-channel notifications using Chart.js, Slack, and Email.	[View Project]
Medical AI Chatbot <i>Python, LangChain, Groq, Hugging Face, Streamlit</i> - Engineered and deployed an LLM-powered Retrieval-Augmented Generation (RAG) Medical AI Chatbot using Python, LangChain, Groq, Hugging Face, and Streamlit. - Designed semantic search pipelines using Sentence Transformers embeddings and FAISS vector databases to improve medical query retrieval accuracy. - Implemented document processing and knowledge retrieval pipelines from medical reference PDFs to enhance response reliability and contextual accuracy. - Integrated scalable deployment workflows and publicly hosted the application on Hugging Face Spaces for real-time usage.	

EDUCATION

Noida Institute of Engineering and Technology B.Tech in Computer Science & Engineering CGPA: 9.06/10	Greater Noida, UP 2023 – Present
Shanti Niketan Senior Secondary School Intermediate 81.60%	Muzaffarpur, Bihar 2022
Shanti Niketan Senior Secondary School Matriculation 90.40%	Muzaffarpur, Bihar 2020

CERTIFICATIONS & ACHIEVEMENTS

- Fortinet Certified: Getting Started in Cybersecurity 3.0
- Fortinet Certified: Introduction to the Threat Landscape 3.0
- Solved 115+ Data Structures and Algorithms problems on LeetCode.
